- 278000 Bitstreams (digital objects)
 - 4,990,798 Bitstreams viewed (system wide) in the last 12 months.
- 1.3TB of storage used
- 98% Open Access
 - 1170 items block access through embargo or authentication

Current Projects

- Streaming Media
 - “Decommissioning” kaltura
 - Implementing an Amazon hosted services that utilize the amazon transcoder
 - JWplayer implementation
 - Approaching the end of the Implementation phase (4/17)
 - Core code work is nearing completion
 - AtMire is working on providing a viewable demo
 - Testing will begin 4/17 – 5/1
 - Production Migraton post 5/1

Current Projects

- Statistics Dashboard
 - Homegrown interface to SOLR statistics
 - Available down to the item level per collection now
- TODO:
 - Exportable reports (CSV, etc)
 - Archive to allow more than 1 year of viewing
 - Paging to allow more than 1 year of viewing
- Requests?

Current Projects

- TAACCCT – Department of Labor Project
 - Time commitment from David and Aaron is pretty small
 - Time is paid by grant funding, so nothing taken away from libraries
 - Benefits
 - Deployed on Amazon hosting
 - Use case for custom API Work (hierarchical faceting)
